Introduction to Green Building Systems

Register online
www.sfccnm.edu

Starts September 6
12 Weeks
Saturdays, 9:00 am to 12:30 pm

Whether you are planning to build a home or want to learn about the emerging Green Building sector of the construction industry, this class is a great start for learning to live green. You'll be introduced to site planning, energy generation and efficiency, material selection, waste management, water conservation and whole systems construction project management.

Who should attend:

Homeowners
Architects
Builders
Contractors
Appraisers
Mortgage lenders
