

FALL 2008

COURSE NUMBER REC 380-01/CRN 21342

Solar Hot Water Systems Installation Program

Register online
www.sfccnm.edu

Dates: September 6, 13, 20 & 27

Time: 9:00 am to 4:00 pm

In this four-week course, participants will be introduced to the different types of solar hot water systems, design principles, the evolution of solar hot water system designs, and introductory installation techniques.

Equipment such as control components, heat exchangers, solar collectors, and storage tanks will be reviewed.

Participants will also be exposed to more complex solar heating applications, including hydronic heating. Participants will have the opportunity to design and install a solar hot water or heating system.
